CAREER OBJECTIVE

Computer Science undergraduate seeking a **Software Engineering role** to apply skills in **Java, Data Structures & Algorithms, Web Development, Automation, and AI-powered applications**. Passionate about building innovative software solutions, solving real-world problems, and continuously learning emerging technologies in a collaborative environment.

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore

2023 – Present

Bachelor of Technology (B.Tech) in Computer Science Engineering | CGPA: 8.69

Kendriya Vidyalaya, Burhanpur

2020 – 2023

12th: 76.5%

10th: 76%

TECHNICAL SKILLS

- Programming Languages: Java, C, C++, Python
- Web Technologies: HTML, CSS
- Databases: MySQL, MongoDB
- Tools & Platforms: Tools & Platforms: Git, GitHub, Docker, n8n, REST APIs, Figma, Canva
- Core Concepts: Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Problem Solving

PROJECTS

- **AI-Powered Internship Outreach Automation System (n8n + Groq AI)**– Developed an AI-powered internship outreach automation system using n8n, Groq AI, Gmail, and Google Sheets to generate personalized emails, automate bulk email delivery with resume attachments, and track application statuses in real time. [Link](#)
- **KBC Quiz Game (Java)** – Developed a console-based quiz application using Java and OOP principles, featuring timer-based gameplay, score tracking, file handling, exception handling, Log4j logging, and email notifications for quiz results. [Link](#)
- **FSLAKWSS (Few-Shot Language-Agnostic Keyword Spotting System)** –Contributed to the development of a real-time multilingual keyword detection system using Python, PyTorch, FastAPI, and React, leveraging few-shot learning for audio analysis and keyword localization. [Link](#)
- **Cricket Win Predictor (GUI Application)** – Built a Java AWT-based application to predict match outcomes using inputs like runs, overs, and team data, providing an interactive user interface.
- **FinTrack (MongoDB-Based Expense Management System)** – Developed a system to track and manage personal expenses, enabling users to store, analyze, and visualize financial data efficiently using MongoDB.
- **Responsive Web UI Clones (Swiggy & Facebook)**– Designed and developed responsive UI layouts by replicating Swiggy and Facebook interfaces using HTML and CSS, focusing on reusable components and structured design.

ACHIEVEMENTS

- 5-Star Gold Badge in Java – HackerRank
- Java Certification – HackerRank
- HTML Certification – Great Learning
- C Language Badge – HackerRank
- Solved 100+ Data Structures & Algorithms problems on LeetCode and HackerRank.
